- 1 Based on unpaid principal balances (UPB) of mortgage loans held-for-investment, mortgage loans held-for-sale, and mortgage loans underlying our mortgage-related guarantees.
- 2 Includes the initial \$1 billion liquidation preference of the senior preferred stock issued to Treasury in September 2008, the \$71.6 billion of draws from Treasury, and the \$62.4 billion in increases to our Net Worth Amount pursuant to the Purchase Agreement.
- 3 Based on the Freddie Mac House Price Index. The Freddie Mac House Price Index for the U.S. is a value-weighted average of the state indexes where the value weights are based on Freddie Mac's single-family credit guarantee portfolio. Other indices of home prices may have different results, as they are determined using different pools of mortgage loans and calculated under different conventions. The Freddie Mac House Price Index for the U.S. is a seasonally-adjusted monthly series. Percent changes were rounded to nearest whole percentage point.
- 4 Represents the estimated average rate of guarantee fees for new acquisitions during the period assuming amortization of upfront fees using the estimated life of the related loans rather than the original contractual maturity date of the related loans. Net of the legislated 10 basis point fee remitted to Treasury pursuant to the Temporary Payroll Tax Cut Continuation Act of 2011 as extended by the Infrastructure Investment and Jobs Act.
- 5 Based on the company's purchases of loans and issuances of mortgage-related securities. For the periods presented, a single-family borrower may be counted more than once if the company purchased more than one loan (purchase or refinance mortgage) relating to the same borrower. For Multifamily, rental units include units financed by supplemental loans.
- 6 Consists of both home retention actions and foreclosure alternatives.
- 7 Categories are not mutually exclusive, and a borrower in one category may also be included in another category in the same or another period. For example, a borrower helped through a home retention action in one period may subsequently lose his or her home through a foreclosure alternative in a later period.
